JANIS COSTS

1. Estimated cost of reproducing JANIS, 1000 copies, 6 studies per year:

- a. By offset from IBM machines - \$100,000.
- b. By offset from set type - \$200,000.

Under present method of reproduction (typesetting plus letter press and engraving) costs would be still higher. No allowance has been made for cost of reproducing maps at Army Map Service, inasmuch as AMS has absorbed such costs under its own budget.

2. According to the original basic directive of JISPB (1 July 1943) signed by the Chiefs of ONI, G-2 and OSS, costs of printing are to be allocated to each agency in proportion to the number of copies each takes. At present the approximate ratio of copies taken by each department is as follows: War 6; Navy 3; State 1.

3. On the basis of the ratio above at 100,000 cost each agency's share would be as follows: War \$60,000, Navy \$30,000, State \$10,000. At 200,000 each agency would contribute twice this amount.

4. Inasmuch as JANIS is produced at request of JCS Committees, it is recommended that the JCS contribute \$25,000-\$50,000 toward JANIS printing costs. Under this plan each agency's share would be approximately:

A. At \$100,000 printing costs:		B. At \$200,000 printing costs:	
JCS	\$25,000	JCS	\$50,000
War	45,000	War	90,000
Navy	22,500	Navy	45,000
State	7,500	State	15,000
